

# ROYCE THOMPSON LIMITED

## CONTROL PANEL DIVISION

## CONTROL PANEL SPECIALS & LIGHTING CONTROL

Royce Thompson manufacture a range of standard control panels that incorporate time switches, contactors, override switches, relays etc., items often required when using photoelectric control units for interior/exterior and tunnel lighting.

We would be pleased to quote from our standard range of lighting control panels or alternatively we can design and manufacture to meet individual requirements.

Royce Thompson also manufacture special purpose control panels for industry in the ever changing market requirements for automation, instrumentation and data collection systems.

Panel and software design are driving the process of change with the new generation of PLC's having a number of features which simplify wiring and therefore the checking procedures.

We aim to incorporate the latest technology which complies with the relevant safety regulations in our products.

Royce Thompson have been manufacturing control panels since 1958 and our team are available to discuss your requirements.
