

ROTAFLASH TIMER

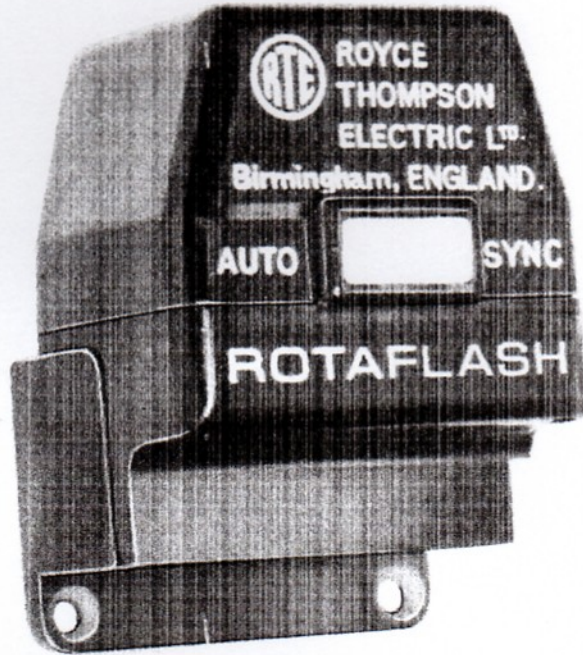

THE R.T.E. Rotaflash Timer is designed to comply with the latest requirements of the Dept. of Environment for pedestrian crossings, and will fulfill many applications where flashers are needed.

The whole unit plugs into a terminal block (as used on the RTE/P42 Photo-Cell unit) and is therefore easily removable for maintenance. The synchronising of one flasher with another can be carried out by using the auto/sync. rocker switch.

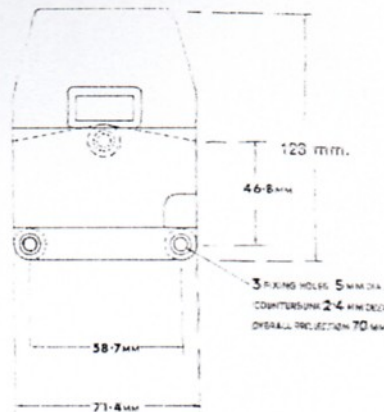

Suitable for 240 volt 50 Hz supply, and enclosed for use in pedestrian crossing beacons.

TWO YEARS GUARANTEE

N.B. B.1 Enclosure should be used if controller is accessible to unauthorised personnel.

Nett Weight 0.3 kg.
